# Integrating psychology and dietetics: 'Understanding Eating Habits' Group

**Amy Bull (RD, PGDip Dietetics, BSc (Hons) Nutrition)**

**Lead Weight Management Dietitian**

**Musgrove Park Hospital, Taunton and Somerset NHS Foundation Trust**

Together we make the difference

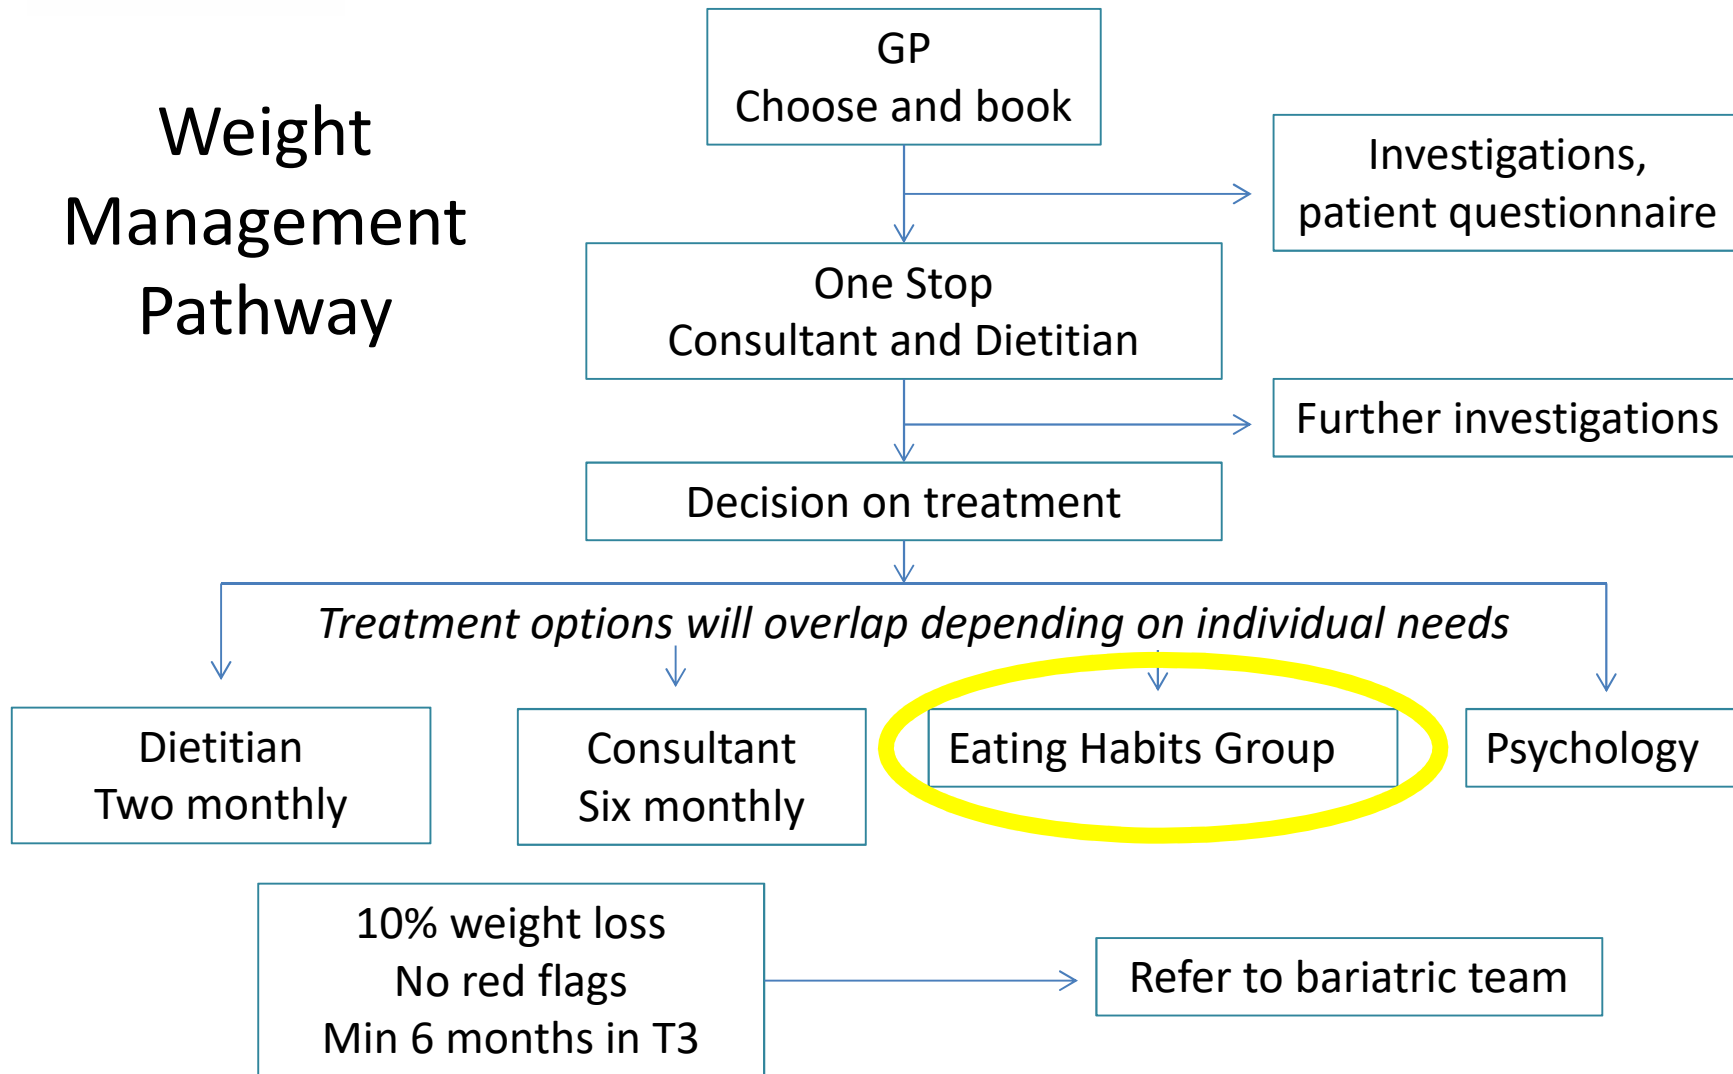

# Aims of this session

- ✓ Provide an overview of where the group fits into our pathway
- ✓ Provide an overview of the 'Understanding Eating Habits Group'
- ✓ Share experiences of integrating psychology and dietetics within a group setting
- ✓ Share outcome data and findings

# Weight Management Pathway

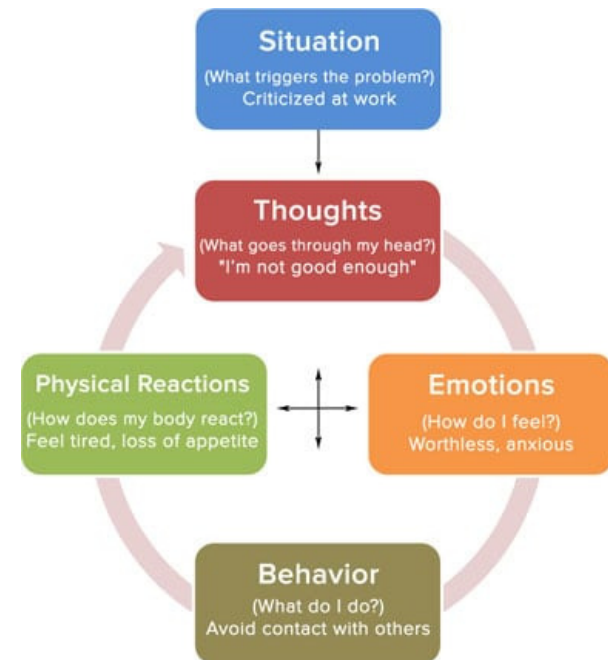

# Group details

- 10 weeks, 2 hours per session
- Group size - min 14, max 20 people
- Group resources given weekly to build portfolio. Weekly challenges set relating to course content.
- Outcome data collected from pre and post questionnaires. We do not use weight as a measurement.

# Therapeutic models/approaches

- CBT
- Mindfulness
- Compassion focused therapy
- Motivational interviewing

Working together for a healthy Somerset

# Group limitations

- Day time group only
- Limited to 3 groups per year, although seems to meet current demand
- No group support following the group
- Uptake is mainly female

“While it did not bother me, some, males might find it a bit daunting to be in an exclusive female group.”

# Outcome measures

- Referrals, uptake, retention rates
- Global EDE-Q:
  - Restraint
  - Eating concern
  - Shape concern
  - Weight concern
- No. of BE episodes with perceive loss of control
- Hospital anxiety and depression scale
  - Anxiety
  - Depression

*Descriptive statistics and Wilcoxon Signed-Ranks results comparing pre and post results on the measures of weight concern, global, BED and depression*

	N	Median (Range)		Z score	Sig.
		<u>PRE</u>	<u>POST</u>		
<b>Weight Concern</b>	51	4.40	3.80	-3.23	<b>.001</b>
<b>Global</b>	51	3.74	3.26	-5.03	<b>.000</b>
<b>BED</b>	50	5.00	2.50	-2.51	<b>.012</b>
<b>Depression</b>	51	9.00	7.00	-2.57	<b>.010</b>

# Patient evaluation - comments

“This course has been the best thing I’ve ever done! For the first time in my life I feel different about my weight and the person I am”

“I’m excited to put things learnt into practice & feel I have all I need to continue my journey.”

“Didn’t think it would be helpful but certain things have started resonating.”

“It was very helpful as it explained a lot of questions & answers I have.”

# Patient evaluation - comments

“I've found this group very helpful, I think reading and re-reading my pack will be very helpful for me maintaining a healthier future.”

“It was very helpful as it explained a lot of questions & answers I have.”

“Really useful and thought provoking, kept me thinking between sessions”

“Found group very beneficial and supportive. My self-esteem/confidence has improved. Not felt dictated to which was good. No blame.”

# Reflections

- Reinforces the importance of reducing isolation for patients – “It’s not just me”
- Value of working collaboratively
- Upskilling of both the psychologist and the dietitian both within the group and within 1:1
- Impact on subsequent 1:1 work

# Thank you for listening

## Any questions?
